

Aravind Jegadesan

Senior Software Engineer

Chennai, India | Open to Remote and Hybrid roles | aravindjegadesan@gmail.com | +91 9626034710 | [linkedin.com/in/aravind-jegadesan-11ba6269](https://www.linkedin.com/in/aravind-jegadesan-11ba6269)

Target roles: Lead Backend Engineer | Staff-level IC | Backend Architect | Forward Deployed Engineer

Professional Summary

Senior Software Engineer with 10+ years of experience building enterprise Java, Spring Boot, distributed workflow, CI/CD, integration, and data-intensive systems across telecom, fintech, and financial services environments. Strong fit for Lead Backend Engineer, Staff-level IC, Backend Architect, and Forward Deployed Engineer roles requiring hands-on execution, architecture judgment, customer-facing implementation, release maturity, system reliability, and performance optimization.

Core Technical Strengths

Architecture: Distributed systems, Temporal workflows, event-driven design, fault tolerance, service boundaries, scalability tuning

Backend: Java, Spring Boot, Spring Batch, Hibernate, REST APIs, design patterns, system design

Cloud and Delivery: Docker, Kubernetes, GitHub Actions, Jenkins, CI/CD, zero-downtime deployments, monitoring

Data: Oracle SQL, PostgreSQL, MySQL, query optimization, indexing, data modeling, stored procedures

Engineering Outcomes

- Improved release speed and reliability by 45% by implementing CI/CD pipelines with GitHub Actions.
- Designed Temporal-based distributed workflows for automated backend orchestration and operational visibility.
- Improved backend module performance by 30% through refactoring, database indexing, and query optimization.
- Built SEM data ingestion pipelines supporting fraud and risk detection use cases.
- Reduced manual deployment intervention by 35% through build and deployment automation.

Professional Experience

Senior Software Engineer - Oportun

Dec 2024 - Present | Chennai, India | Remote

- Own backend reliability, CI/CD maturity, Temporal orchestration, SEM ingestion pipelines, integrations, and production readiness for fintech risk systems.
- Implemented GitHub Actions pipelines that improved release speed and reliability by 45%.
- Designed scalable Temporal workflows for distributed backend orchestration, retries, and operational traceability.
- Strengthened service resilience through logging, monitoring, fault tolerance, and zero-downtime deployment practices.

Specialist Software Engineer - Societe Generale

Mar 2022 - Dec 2024 | Chennai, India | Hybrid

- Delivered scalable and secure backend modules for high-volume financial transaction systems.
- Improved backend performance by 30% through code refactoring, database indexing, and query path optimization.
- Supported architecture reviews and guided stronger Spring Boot, CI/CD, code quality, and maintainability practices.
- Mentored junior engineers through code review, design guidance, and production-quality engineering standards.

Application Development Specialist - Accenture Solutions Pvt Ltd

Sep 2019 - Mar 2022 | Chennai, India | Onsite - 5 days office

- Built enterprise-grade APIs using Spring Boot, Hibernate, and Oracle SQL.
- Improved production stability through structured exception handling, monitoring, and error tracking.
- Collaborated in agile delivery teams to ship secure, maintainable backend services.

Senior System Engineer - Infosys Limited

Jan 2019 - Sep 2019 | Chennai, India | Onsite - 5 days office

- Built cloud-compatible Java backend modules across Windows and Linux environments.
- Automated build and deployment tasks, reducing manual intervention by 35%.
- Optimized multithreaded services and database queries for improved runtime performance.

Programmer - Chainsys India Pvt Ltd

Jun 2016 - Jan 2019 | Chennai, India | Onsite - 5 days office

- Developed Java backend workflows and database-backed application modules for enterprise data processing use cases.
- Built data pipelines and batch processing flows, increasing processing efficiency by 20%.
- Created and optimized stored procedures, triggers, indexes, and SQL queries for high-volume database operations.
- Supported production issue analysis by debugging application flows, validating data movement, and correcting failed processing scenarios.
- Collaborated with QA and implementation teams to deliver stable releases, defect fixes, and client-specific enhancements.

Education

B.Tech in Computer Science and Engineering - B.S. Abdur Rahman University, Chennai | 2012 - 2016
